This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

**Founder Class (EUR) Dist. ISIN IE00BLF7VB07**

**HC Boston Common Global Equity Impact Fund (the "Fund"), a sub-fund of Harrington Cooper UCITS Funds ICAV**

**The Fund is managed by Harrington Cooper Asset Management Limited**

## Objectives and Investment Policy

### Investment Objective

The investment objective of the Fund is to achieve long-term capital appreciation by investing in a diversified portfolio of global stocks of companies that are selected with regard for both financial and sustainability criteria.

### Investment Policy

The Fund seeks to invest in a diversified portfolio of global stocks of companies that are selected with regard for both financial and sustainability criteria and which provide products or services enabling solutions that positively impact society and address sustainability challenges globally, as determined by the Investment Manager, and in part as described by the UN Sustainable Development Goals. The Fund generally invests in stocks with equity capitalization (including all classes) of greater than \$2 billion (U.S.). The Fund primarily invests in stocks listed and traded on the markets and exchanges located in countries represented in the Morgan Stanley Capital International (MSCI) All Country World Index. The Investment Manager believes that the MSCI All Country World Index is the most appropriate benchmark to compare the Fund's performance because it represents a diversified portfolio of global stocks. However, the Fund is not managed to replicate the performance of the MSCI All Country World Index. Since the Fund will invest in a relatively concentrated portfolio and focus on solutions to global sustainability challenges, the Fund's performance and characteristics may differ significantly from those of the MSCI All

Country World Index. The Fund is actively managed. This means that the Investment Manager applies a detailed fundamental analysis in order to selectively pick companies in a discretionary manner. The Fund is not managed relative to a benchmark index. The Fund may use financial derivative instruments with the aim of limiting the effect that changes in foreign exchange rates may have on the value of the Fund.

### Fund Currency

The base currency of the Fund is US Dollar.

### Income

The shares will be distributing. Dividend income will be paid out to investors on at least an annual basis.

### Subscription and Redemption

Investors may buy and sell shares on any day on which the banks in Ireland and the New York Stock Exchange are both open.

### Investment Horizon

The Fund is suitable for retail and institutional investors seeking a medium to long term investment with an emphasis on sustainability and positive social impact. Before investing, investors should satisfy themselves that their attitude to risk matches the risk profile of an investment in this Fund

## Risk and Reward Profile

The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period. As this share class has not been in existence for 5 years, simulated performance data has been used. The risk and reward indicator illustrates where the Fund is positioned in terms of its possible risks relative to its potential rewards. The higher the position on this scale, the greater the possible reward, but also the greater risk of losing money. This risk indicator is calculated using simulated historical performance data, which cannot be used as a prediction for the future. Therefore, the risk classification is not guaranteed and may change over time. Even if the Fund is in the lowest risk class you can lose money, as no investments are entirely risk free. Your initial investment is not guaranteed.

### Why is this Fund in this category?

The Fund has been classified in category 6 as it is expected that its price will experience moderate to high rises and falls due to the changes in the prices of investments held by the Fund which may both rise and fall.

The Fund category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.
- The Fund will invest in shares priced in currencies other than the currency of the share class. This may result in the value of the share class increasing or decreasing due to changes in foreign exchange rates.

Risks for this Fund which are not taken into account in the indicator include:

**Counterparty risk:** which may occur due to the fact that the Fund might have exposure through contracts with third parties.

**Liquidity risk:** The risk that some securities held by the Fund may be difficult or impossible to sell at the desired time and price in particular during extreme market conditions.

**Emerging Markets Risk:** Due to the global nature of the portfolio of investments, some exposure may be had to companies in emerging markets. Such investments can involve higher risks than investing in established economies or securities markets. Emerging markets may have less stable legal and political systems, which could affect the safe-keeping or value of assets.

For full details of all the risks the Fund is exposed to please refer to the "Risk Factors" section of the Prospectus and "Risk Factors" section of the supplement relating to the Fund.
